From Reverend Michael Peterson

Please mark your calendar for Saturday, September 27th, for the next Diocesan Season of Spiritual Renewal service, which is at St James', Orillia, at 2pm. These services feature lively music, good preaching, and a chance to meet folks from across our large Diocese.

We've chartered a smallish (24 seat) bus to take people there in comfort and with no parking hassles, if you'd like a seat please let Fr Michael know."

This fall our Regional Ministry will be running an Alpha course, starting on September 9th and running most Tuesday evenings through until November 25th. Alpha is an introduction to Christian basics and tries to provide answers to our most profound questions. It is ideal for new believers and for anyone who wants to deepen their faith. Some sessions will be in person, most will, be on Zoom.

We could use several people who would be willing to be small group of facilitators which means being friendly and helping keep conversations on track.

If you would like to help in this capacity, please contact Fr. Michael at madpadre@gmail.com

Forward Day by Day August September, October are available for pick up at the church office. A donation towards the cost would be appreciated.

Reduce Your Environmental Footprint - Reduce Your Footprint at Home –

Make your garden or backyard pollinator friendly. Here's a guide to get you started

Gypsy Cuckoo Bumblebee

This large bumblebee once had an extensive range in Canada and was recorded in all provinces and territories except Nunavut. There has been a large decline in the past 20 – 30 years, and in 2014 the species was listed as endangered in Canada. It has not been found in Canada in recent years, and the last recorded sighting in Ontario dates back to 2008. The gypsy cuckoo bumblebee is a nest parasite of other bumblebees, including two species that are also in decline. Primary threats include the decline of these other "host" bumblebees, as well as pesticide use (particularly neonicotinoids) and pathogens from non-native bumblebees used in commercial greenhouses.
