Green Initiatives – Crack a Window, Not Your Wallet: 12 Easy ways to Save Energy and money this Summer in Canada – Energy Saving Tip Number 2 Keep That Thermostat on a Budget

Every degree counts-literally.

- Set your thermostat at 25°C (78°F) during the day when you're home.
- Use a programmable thermostat to raise the temp when you're away.
- Ceiling fans can complement this setting to make the room feel cooler.

Fun fact: Each degree above 22°C can save you 3-5% on your cooling costs, according to Natural Resources Canada.

From Reverend Michael

If you're looking for summer reading, Fr Michael recommends *What Grows In Weary Lands: On Christian Resilience*. The author, the Rev. Tish Harrison Warren, is an Anglican priest and was a columnist for the New York Times. Her book offers "a fresh vision for navigating burnout and weariness through ancient Christian practices - guiding us toward lives of resilience, renewal, and flourishing". In September this book will be our next choice for the Rector's Book Study.

The next Worship in Creation: August 1 at 10am Location details will be provided soon.

Join us for **Worship in Creation**, a new outdoor worship opportunity beginning this summer. Together we will gather in God's creation for a gentle walk, prayer, Scripture, reflection, and Holy Communion. Each gathering will invite us to slow down, notice God's presence in the natural world, and worship together outdoors.

Our walks are designed to be unhurried and accessible, with the pace guided by the group. Come and experience worship surrounded by God's beautiful creation.

New This Summer!
